Full-Stack Software Engineer Software engineer with a foundational background in Aviation & Rocketry Engineering. Specialized in building high-performance, fault-tolerant web applications, robust automated systems, and scalable e-commerce solutions. Proven ability to bridge complex backend architectures with responsive, pixel-perfect frontend interfaces.

CORE COMPETENCIES

- **Frontend:** React, Next.js, Angular, TypeScript, Redux, RxJS, Tailwind CSS, HTML5/CSS3.
- **Backend & Automation:** Python (Aiohttp 3, Flask, Appium), PHP, Node.js, SQL (SQLite, MySQL), SQLAlchemy.
- **DevOps & Infrastructure:** Linux Administration (Ubuntu), Nginx, Systemd, Cron, Webhook Architecture.
- **Tools & E-commerce:** Git, Docker, Shopify Liquid, WordPress, REST API integrations.

PROFESSIONAL EXPERIENCE

Digicode | Kyiv, Ukraine *Front-End Developer / Full-Stack Engineer* | Sep 2023 – Present

- Engineered and maintained a high-performance e-commerce platform (Online bicycle store), improving layout stability and implementing complex UI enhancements.
- Architected a custom CMS with an automated game server monitoring system, reducing manual tracking overhead by 100% via Cron-based data aggregation.
- Integrated external APIs (including Monobank for secure payment processing), achieving a 99.9% success rate for fault-tolerant financial transactions.
- Developed complex, responsive HTML email templates using MJML, ensuring strict cross-client compatibility (Gmail, Outlook, Apple Mail) and optimizing rendering for high-volume marketing campaigns.

Freelance / B2B Solutions *Full-Stack Engineer (Python/DevOps)* | Nov 2024 – Present

- Architected and deployed a scalable automation farm running 10+ concurrent Android emulators on a dedicated Linux server without performance degradation.
- Developed a thread-safe RESTful API using Flask & SQLAlchemy to orchestrate Appium instances.
- Optimized server performance by configuring Systemd watchdogs and Gunicorn workers to eliminate Out-Of-Memory (OOM) crashes and ensure 24/7 uptime.
- Built a high-load Telegram Web App (Karma-Case) utilizing an asynchronous SQLite driver (aiosqlite) to prevent database lockups during high-frequency concurrent transactions.
- Engineered a WordPress Geo-Traffic Shield plugin, effectively blocking thousands of malicious bot requests monthly using "White Page" technology.

EDUCATION National Aerospace University – Kharkiv Aviation Institute *Aviation Engineering & 3D Modeling*
